

Fantom Bonk is the first Fantom coin made *by the people - for the people*.

A total of 35% of the supply is airdropped to holders of prominent Fantom NFT collections. We were tired of low volume within the FTM markets and sought to transform the ecosphere by rewarding those that give fantom the spotlight that it deserves. No VCs, no presale, just lots of fun; a fair launch ensures that everyone has an equal playing field.

The **35% airdrop** shall be split as follows:

- **20% to 20 native Fantom NFT collections**, comprising a total of **65,000 NFTs**
- **6% to 12 NFT collections with 1/1 art**
- **5% to new builders within FTM - Equalizer & Mummy**
- **2% to the Fantom Foundation**
- **2% to Fantom Devs**

The Full Details are available in the FBonk Whitepaper

The total supply of **1B** tokens shall be distributed as follows:
